

# Nahid Hasan Ukil

Full-Stack Python Developer · Django · DRF · React.js · Next.js · PostgreSQL

nahidukil547@gmail.com · +880 1646 695565 · Dhaka, Bangladesh · [github.com/nahidukil547](https://github.com/nahidukil547) · [nahidhasanukil.vercel.app](https://nahidhasanukil.vercel.app)

## PROFESSIONAL SUMMARY

Full-Stack Python Developer with 1.5+ years of production experience building AI-powered platforms, SaaS products, and scalable REST APIs. Specialized in Django and DRF on the backend, React.js and Next.js on the frontend, and PostgreSQL for data architecture. Delivered ERP modules and a full LMS platform end-to-end. Experienced integrating AI services (Google Gemini API), payment gateways, and cloud storage (AWS S3). Writes clean, maintainable code and thrives in remote-friendly, fast-moving startup environments.

## TECHNICAL SKILLS

|                      |                                                                                                      |
|----------------------|------------------------------------------------------------------------------------------------------|
| <b>Backend:</b>      | Python · Django · Django REST Framework · REST API Design · Flask (familiar) · JWT Auth · Python OOP |
| <b>Frontend:</b>     | React.js / Hooks · Next.js · JavaScript (ES6+) · Tailwind CSS · HTML5 · CSS3 · AJAX / jQuery         |
| <b>Database:</b>     | PostgreSQL (Joins, CTEs, Indexing) · MySQL · SQLite · Django ORM & QuerySets · Schema Design         |
| <b>DevOps:</b>       | Git / GitHub · Linux · AWS S3 · Jira · Figma                                                         |
| <b>Integrations:</b> | Google Gemini API · SSL Commerce · SMTP · JS2PDF                                                     |

## WORK EXPERIENCE

### OPZO Technologies · Full-Stack Developer

Sep 2025 – Present | Dhaka, Bangladesh · Full-time

- Designed and developed scalable ERP modules — Sales, Supply Chain, Inventory, and Permission Systems — using Python and Django, following clean architecture principles.
- Built and maintained RESTful APIs orchestrating complex business workflows (CS → PR → PO → TR → TP pipelines), consumed by React.js frontends.
- Optimized critical PostgreSQL queries through targeted indexing and schema redesign, measurably reducing API response times.
- Collaborated daily with QA and frontend teams in Agile sprints via Jira; debugged and resolved cross-module issues under production SLAs.

Stack: Python · Django · DRF · PostgreSQL · REST API · Linux

### Izaan School of Engineering · Full-Stack Developer

Oct 2024 – Aug 2025 | Plano, TX, USA · Remote

- Built the complete API layer for a live and recorded-video LMS: Django, DRF, role-based permissions, SMTP, JS2PDF — a full SaaS product lifecycle from design to deployment.
- Architected backend and REST endpoints for a second consultancy-variant LMS; ensured performance, security, and scalability across both products.
- Developed a Talent Hunting Portal with React.js frontend and Django APIs for job search/filter, application tracking, interview scheduling, and role-based permissions.
- Worked fully remotely in a cross-timezone team, delivering features iteratively with clear async communication.

Stack: Python · Django · DRF · React.js · PostgreSQL · JWT Auth · AJAX

## KEY PROJECTS

## Single Vendor E-commerce Platform

*Python · Django · React.js · PostgreSQL · SSL Commerce · Google Gemini API · AWS S3*

- Full-featured store with product catalog, cart, two-tier permissions, and Django All-Auth; deployed with AWS S3 for media storage.
- Integrated SSL Commerce payment gateway, SMTP transactional email, and a Gemini AI chat assistant — practical AI/SaaS integration in a live product.

## LMS Platform (Izaan School of Engineering)

*Django · DRF · React.js · JWT Auth · PostgreSQL*

- End-to-end LMS covering live/recorded video delivery, user role management, PDF generation, and multi-tenant architecture — production SaaS product.

## Job Portal Web Application

*Python · Django · REST API · HTML/CSS · AJAX · jQuery*

- Full REST API backend with search/filter, one-click apply, interview scheduling, role-based auto-assignment, and a Django Admin CMS.

**Additional:** Weather App · To-Do App · Blog Portal · Three-Step Authentication System — React.js, Python, Django, JWT Auth.

## EDUCATION

---

### Diploma in Computer Science Technology

*Aug 2019 – Dec 2023*

Daffodil Polytechnic Institute, Chandpur · CGPA: 3.56 / 4.00

## ADDITIONAL HIGHLIGHTS

---

- **AI/ML Integration:** Google Gemini API deployed as an intelligent chat assistant in a live e-commerce backend — direct experience building AI-powered products.
- **Cloud:** AWS S3 for file/media storage in production; familiar with cloud deployment practices for scalable SaaS.
- **Remote-ready:** 10+ months of fully remote, async collaboration with a US-based team; strong written communication and self-management skills.
- **Agile:** Hands-on Jira experience for sprint planning, task tracking, and team coordination.
- **Open Source:** Active GitHub — [github.com/nahidukil547](https://github.com/nahidukil547) — with personal and professional projects.
