Nahid Hasan Ukil

Full Stack Software Developer | Python, Django, SQL, React.js, JavaScript

Chandpur Sadar Upazila, Chattogram, Bangladesh

Summary

I'm a Full Stack Developer with hands-on professional experience building production-grade web applications. Currently at OPZO Technologies, I develop and maintain ERP modules — Sales, Supply Chain, Inventory, and Permissions — using Django and Django REST Framework, with a focus on clean API design and PostgreSQL performance. Previously at Izaan School of Engineering (remote, USA), I built the complete backend for a live LMS platform and a Talent Hunting Portal from the ground up. What I work with: Python · Django · DRF · PostgreSQL · React.js · JWT Auth · AWS S3 · Google Gemini API I enjoy solving real backend problems — whether that's optimizing a slow query, designing a clean REST API, or integrating an AI feature into a production system. Open to Python/Django backend or full stack opportunities — feel free to connect or message me at nahidukil547@gmail.com

Experience

Opzo Technologies

Software Engineer

September 2025 - Present (9 months)

Block-B, House-77/A, Rd No # 14, Dhaka 1213
